

New sources of data and how it can support commissioning

Lung Clinical Leads Workshop
April 2012

Trish Stokes,
COSD Programme Manager NCIN

Overview

- New datasets
 - SACT
 - DID
 - COSD
- COSD
 - What is it
 - Why
 - When
 - How will it affect you?

Chemotherapy – SACT (1)

- ISN from April 2012 (ISB 1533)
 - All patients receiving cancer chemotherapy
 - Adult – solid & haematology
 - Paediatric
 - Phased implementation until April 2014
 - Clinical sign-off

Diagnostic Imaging Dataset

- ISN from April 2012 (ISB 1577)
 - To provide information about access of NHS patients to diagnostic imaging tests across the country
 - All diagnostic imaging tests carried out on NHS patients
 - Monthly submissions from local RIS systems
 - Patient level
 - NO RESULTS
 - Access for Cancer Registries

What is COSD?

- The new national cancer dataset
 - Updated, aligned and standardised
- The new Cancer Registration dataset
 - Compiled dataset (assembled by Registries)
 - Defines data for direct submission by Trusts
 - All registerable conditions (eg in situ MM, benign brain tumours)
 - Wider than CWT – patient pathway for all cases
- Components
 - Core (Generic Registration and Cancer Waits)
 - Site specific - clinical (cf nat audit)
 - Site specific - Key pathology (RCPath MDS)

What is COSD?

- Monthly submission
 - Replaces current registry submission
 - Avoid duplication of other dataflows
 - Multiple sources - within and across Trusts
 - Via XML
- Monthly feedback
 - Standard reports
 - Feedback to commissioners

Cancer Registration Modernisation Programme

- To provide ‘timely’ comprehensive
 - Data collection and quality assurance
 - over the **entire** cancer care pathway for
 - all patients treated in England (& UK)
- Resource for
 - patient care, treatment variations
 - quality, safety and performance management
 - audit, research and outcome analyses
- Increased focus on:
 - Stage, radiology, standard datasets, timeliness

Modernisation of Cancer Registration

- By 2013 all 8 English Cancer Registries to be using one single database system:
 - Reduce duplication
 - Data along patient pathway (inc rec/mets)
 - Using national data feeds e.g. GFoCW, HES, RTDS
 - Multiple Local data sources eg MDTs, pathology systems
 - Increased timeliness
 - Regular 'progress' reports to MDTs/trusts

Migration Plan **UPDATE**

COSD - new dataset?

Existing data flows by Tumour site

Operational Testing - Lung

Overall COSD Pilot Ratings: Lung				
Stage 2: All Lung Data Items Rated by Ease of Collection, Completeness of Data and Overall Final RAG rating				Stage 1: National Audit completeness returns
Data Item	Ease of Collection RAG Rating	Completeness RAG Rating	Overall RAG rating	
Smoking Status		18% (24/137)		
Mediastinal Sampling Indicator		0% (0/137)		
Epidermal Growth Factor Receptor Mutational Status		0% (0/137)		
Scan Performed Indicator (CT) - Lu10020				
Procedure Date (CT Scan) - Lu10000				
Scan Performed Indicator (PET) - Lu10030				
Procedure Date (PET CT Scan) - Lu10010				
Bronchoscopy Performed Indicator - Lu10080				
Procedure Date Bronchoscopy - Lu10070				
FEV 1 Percentage - Lu10040				

Implementation Timetable

- Core and stage from January 2013, by end June 2013
- Site Specific from July 2013 & by end 2013
- Site specific Pathology from Jan 2014 & by end 2014

Impact on Current Cancer Datasets

Current dataset	Submission frequency	New Dataset (From JAN 2013)	Submission frequency and type
NCDS	None (reference only)	Replaced by COSD	Monthly via XML
Cancer Registration Dataset	monthly	Replaced by COSD	Monthly via XML
Cancer Waits	monthly	NO CHANGE (some items also in COSD)	NO CHANGE
RTDS (Radiotherapy)	monthly	NO CHANGE	NO CHANGE
Chemotherapy SACT	In progress	NO CHANGE (SACT from April 2012)	(NO CHANGE)
National Audits	Annual (various date ranges and deadlines)	? NO CHANGE (some items also in COSD)	(Audit strategy under development)
RC Pathology –Minimum datasets	None (Professional reporting standard only at present. Project to develop clinical standards)	(COSD - subset only)	Monthly via XML (or current process)
RC Radiology – no minimum datasets at present	None (Recommendations in place for clinical use – no MDS. Pilot in progress for proforma based	? No change (DIDS will collect activity data)	(NO CHANGE)

Issues for Lung

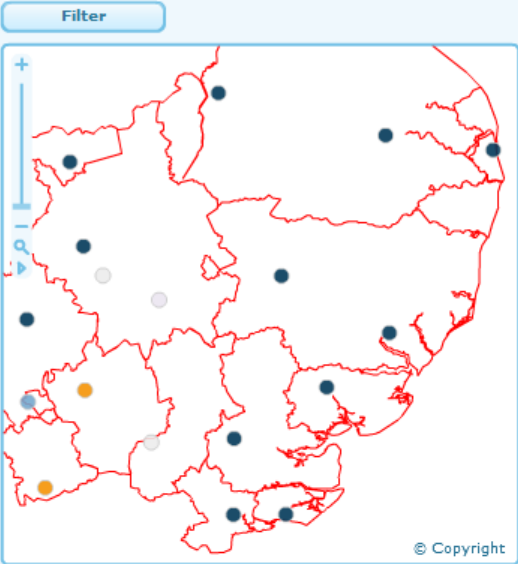

- Impact on LUCADA?
- Ownership
- Resources
- Duplication
- Error management
- Future

- Aligned with audit
- Bigger picture
- Standardised collection – more effective
- Processes – clinical signoff
- Timeliness - diagnosis, treatment and updates
- Monthly feedback
- ?Current error reports - Problem data resolved earlier
- Strategic direction – targeted audits?

- Go Live January 2013 (subject to ISB)
 - ‘State of Readiness’
 - CN Road shows from mid-Summer
 - Organisational & technical topics
 - MDTs & clinical aspects

MDT Performance – Data completeness

This report shows the completeness of certain key data items received each month by a Trust as discussed at MDT. By clicking on your Trust from the map above all the relevant data will appear on the performance chart to the right. You can compare your Trust to another by holding the Ctrl button and selecting another Trust. You can scroll the data down on the right hand side by hovering over the data and using the mouse wheel or holding the scroll bar (far right) and moving down/up. A full user guide is available by clicking the link on the introduction page; this will give you detailed instructions on how to use this report effectively.

Understanding Cancer

Oncology Training for NHS
and Public Health non-clinical staff

Professionally Accredited by the Institute of Healthcare Management

Launch date: 2 April 2012

Key features include:

- flexibility to work at your own pace from work or home
- ability to stop and resume at any point from any computer
- reference guides
- colourful images throughout
- glossary of terms
- learning objectives
- quizzes
- certificate of achievement

Who it is for and what you will learn

This new e-learning tool is aimed primarily at **Multi-disciplinary Team**

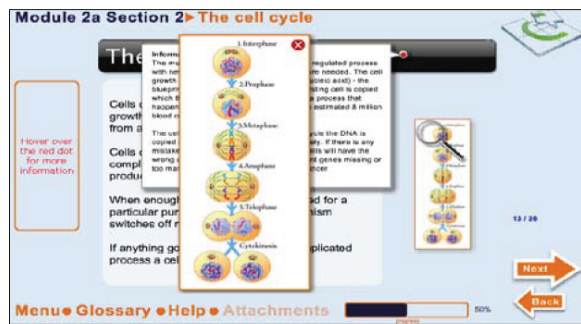

Co-ordinators and Cancer Registration staff who need to know:

- about cancer—medical terminology, diagnostic tests and treatments
- how cancer services are organised in the NHS
- about cancer types—key risks, including causes, risk factors, signs and symptoms, anatomy and physiology

Other NHS staff can also use it to improve their understanding of cancer

What to do next

For more information, visit www.ncin.org.uk. You will be able to self register onto the learning space website ready for the launch on the 2nd April 2012

NCIN website

The screenshot shows the NCIN website homepage. The header features the NCIN logo and a search bar. The navigation menu includes: About NCIN, News and Events, **Collecting and Using Data** (circled in red), Publications, Cancer Information Tools, and Cancer Type and Topic Specific Work. The main content area has four featured tiles:

- COSD Cancer Outcomes and Services Dataset**: Following the recent consultation exercise, an updated version of the COSD dataset is now available for download.
- Site specific work**: See details of NCIN's publications and work on particular cancer sites and types during 2010-11.
- UK Cancer e-Atlas now available**: National and local cancer statistics for incidence, mortality and survival.
- Cancer Commissioning Toolkit**: Key cancer information and data for use by commissioners.

National Cancer Intelligence Network

The NCIN is a UK-wide initiative, working to drive improvements in standards of cancer care and clinical outcomes by improving and using the information collected about cancer patients for analysis, publication and research.

[Find out more about NCIN.](#)

NCIN FOR...

- Analysts
- Commissioners and Policy Makers
- Health Professionals

Are you ready for COSD?

- **This has been coming since January 2008!**
- National contract
 - Guidance & Variation Documents
 - Conformance Guidance coming for 2013/14
- Conformance Reports and monitoring
- Are your MDT systems in place?
- Do your clinical teams know?

Thank you
