The National Cancer MDT Coordinators Forum Team

Due to the current NHS climate and uncertainties about services, etc, this has raised a number of issues regarding the future of our group and the role we can play in supporting MDT Coordinators UK-wide as an integral part of the national agenda for cancer services and outcomes. Whilst NCIN are still committed to funding the work of this group I feel we must actively demonstrate the benefit and value we add to the national cancer programmes. We have decided as a group to restructure ourselves in a more effective way.

We have identified 4 key success areas – annual conference, training programmes, MDT Development Steering Group & our membership/ mailing list, which I think we would want to continue to be involved with.
