

The Cancer Commissioning Toolkit (CCT)

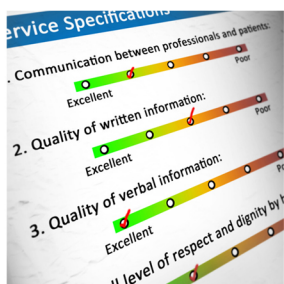

Core Functions

The CCT is the first point of contact for Cancer Commissioners to benchmark the services they commission at different geographical and provider levels.

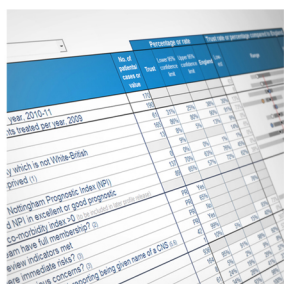

Key Messages –

Central location for overarching messages on cancer, recommendations for investment and disinvestment whilst reviewing some of the myths on cancer and highlighting what can be done now.

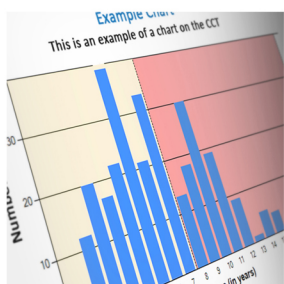

Service Specifications –

Central location for details of agreed cancer type service specifications written for Commissioners and aims to describe what a good service looks like (*format adopted is taken from schedule 20 of Acute Services contract – this allows Commissioners to include such specifications in local contracts with Providers*).

Profiles –

Central location for profiles and other associated nationally available data to help Commissioners of cancer services understand the variation in data outcomes across various organisation levels.

Charts –

Instant chart creation with latest available National submitted and approved data.

Data Extraction –

Extract and download data from the underlying charts for further local analysis.

Signposting/Help/Updates –

User assistance in key areas to inform of additional information held within the CCT or to external relevant sites.
