

Female Life Expectancy at Birth:

Basic Information	
<b>Further Information:</b>	<p>Please see the official metadata information at the following link, as supplied by the Health and Social Care Information Centre (HSCIC)</p> <p><a href="http://www.ons.gov.uk/ons/dcp171778_238743.pdf">http://www.ons.gov.uk/ons/dcp171778_238743.pdf</a></p>
<b>Rationale for inclusion</b>	<p>Variation in mortality and survival may be related to variation in female life expectancy at birth as high mortality and poor survival rates may be contributing to poorer life expectancy.</p> <p>It may be useful to compare the female life expectancy and other indicators as this can help to understand patterns of variation and inform efforts to reduce avoidable deaths and improve the health inequalities.</p> <p>For more information on risk factors associated with gynaecological cancers please see</p> <p><a href="http://www.cancerresearchuk.org/cancer-info/cancerstats/types/">http://www.cancerresearchuk.org/cancer-info/cancerstats/types/</a></p>
