

## From Information to Intelligence: The Quality Performance Framework Initiative

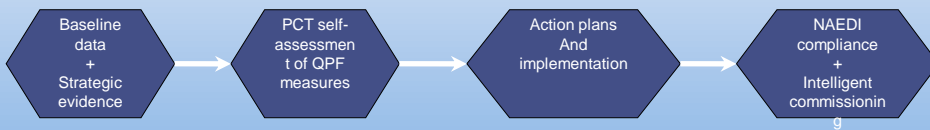

**Anna Murray**  
**Cancer Information Analyst**

## The Cancer Reform Strategy

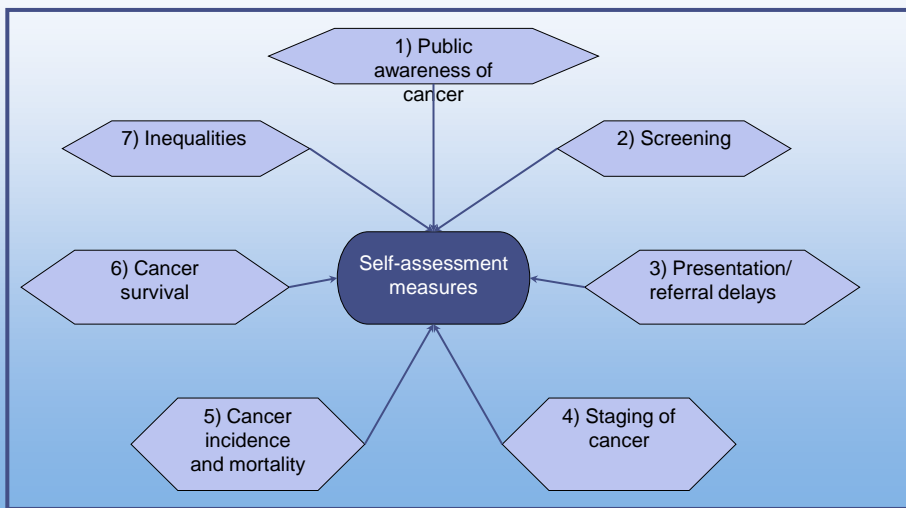

## The Quality Performance Framework Initiative

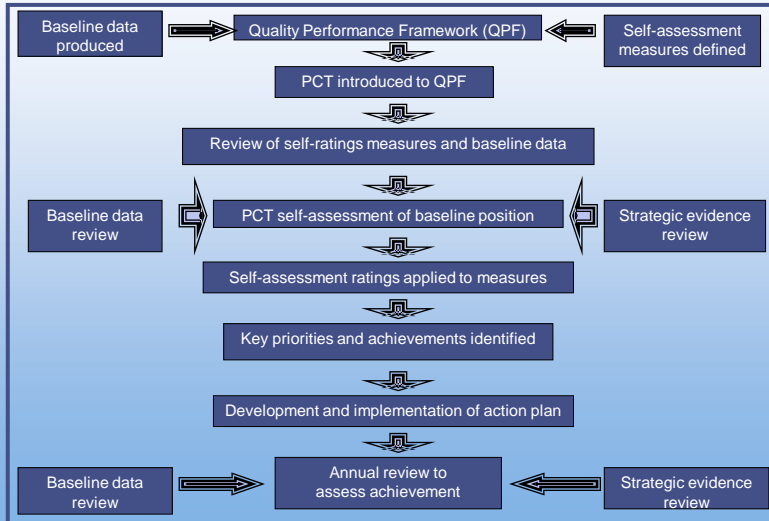

### An outcome driven intelligence dashboard

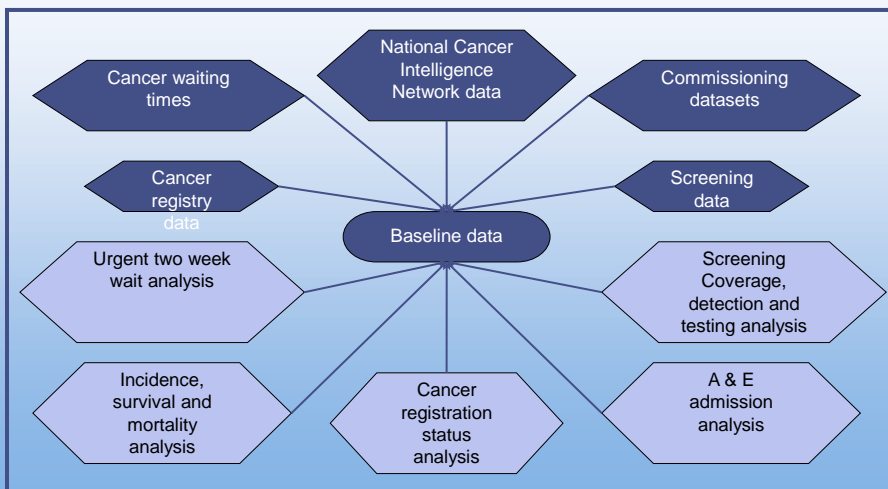

## Self-assessment Measures

## The Liverpool Pilot

## Baseline data

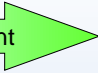

## Strategic Evidence

- Operational plans
- Audits
- Local initiatives e.g. Healthy Community Collaborative
- Monitoring of cancer intelligence data

## Self-assessment

5b	Does the PCT review cancer mortality?
Level 1	The PCT has not completed baseline cancer mortality data
Level 2	Some evidence of recording cancer mortality emerging, but not for all the main cancers, bowel, lung, breast and prostate
Level 3	Cancer mortality completed for all the main cancers. National and international benchmarks completed. PCT ambitious cancer mortality has been set.
Level 4	Cancer mortality completed for all the main cancers. National and international benchmarks completed. PCT ambitious cancer mortality has been set. The PCT has reviewed the cancers where the cancer mortality is the highest.
Level 5 Excellent	Cancer mortality completed for all the main cancers. National and international benchmarks completed. PCT ambitious cancer mortality has been set. The PCT has reviewed the cancers where the cancer mortality is the highest. Mortality rates have been scoped for the over 75s

## Liverpool Pilot Results

Increasing improvement 

						
Number	Measure	Level1	Level2	Level 3	Level 4	Level 5
4a	How complete is staging data for cancers 3 months after registration?					
4b	Is MDT performance improving?					
5a	Does the PCT review cancer incidence?					
5b	Does the PCT review cancer mortality?					
6a	Does the PCT review survival data?					
7a	Can the PCT identify specific groups where the cancer inequalities are the greatest?					

## The Future

### PCT Toolkit Menu

-  PCT commissioning plans
-  Screening leadership
-  Social marketing
-  Cancer network awareness campaigns
-  Incidence
-  Survival
-  Mortality
-  Close database
