	Linkage
	Cancer Stats overview and CHI
15:00	Afternoon Coffee + Networking
15:15	Wrap-up, v8.0 and Future
15:30	Finish

Public Health
England

Who are the NCRAS

- The NCRAS are the National Cancer Registration and Analysis Service.
- We collect data on every patient who is diagnosed with a registrable Tumour in England
 - 350,000 New cases registered each year
- We get data from COSD, Pathology, PAS, SACT, RTDS, HES, Cancer Audits and ONS
- This allows us to do some fantastic analysis at Trust, Regional and National level
- I'm here today to outline the changes to COSD, what has improved, what needed updating (or removing) and to hopefully encourage a closer working community, working together to get things right?
