Public Health England

Group Discussion

What you have done that has made a difference and improved data completeness and quality?

Public Health England

Group Discussion…

- **20 Minutes**
- This could be improvements in just one MDT or Trust wide
- Sharing good practice is better than re-inventing the wheel
- Sharing ideas and contact details, improves your network and support
- Nominate one person on each table to collate and discuss these with the whole roadshow
- We will collect these and create a good practice fact-sheet at the end of all the roadshows for you to download
