Cancer Alliance Data Pack

By CCG

February 2018

Version 1.1

Produced by the Cancer Alliance Data, Evidence and Analysis Service (CADEAS)

For any enquiries contact: england.CADEAS@nhs.net

Contents

- 1 Summary of key findings
- 2 About the data pack
- 3 How to interpret the data
- 4 Further data releases
- 5 Alliance key indicators grid
- 6 Alliance key indicators grid, with values
- 7 Alliance indicators by CCG

Outcome indicators

- ◆ One-year age-standardised net cancer survival
- ◆ Under-75 age-standardised cancer mortality rate
- ◆ Cancer prevalence
- ◆ Patient experience: rating of overall care

Pathway indicators

- ◆ Bowel screening uptake and coverage
- ◆ Breast screening uptake and coverage
- ◆ Cervical screening coverage
- ◆ Cancers diagnosed through an emergency presentation
- ◆ Routes to diagnosis: breast, colorectal, lung and prostate cancer
- ◆ Cancer waiting times: two-week wait and 62-day standard
- ◆ Age-standardised cancer incidence rate
- ◆ Cancers diagnosed at stage 1+2
- ◆ Cancers staged
- ◆ Median waiting times: prostate, colorectal and lung cancer

8 Annex of data sources

This data pack uses information provided by patients and collected by the NHS as part of their care and support

Version Number	Detail	Date
1.0	Initial release	12/02/2018
1.1	Text in the pack has been updated to reflect change from internal to public use	20/11/2018

1. Summary of key findings

The North East and Cumbria Cancer Alliance

Latest data on some key cancer indicators suggest the standard of cancer care in the Alliance* was generally similar to the England levels, although survival and mortality were worse in several CCGs. There was, however, variation across CCGs within the Alliance.

Hambleton, Richmondshire & Whitby CCG reported all indicators better than or similar to the England levels. Conversely, South Tees and Sunderland CCGs had a number of indicators which were worse than the England levels.

Screening: Six CCGs reported all screening uptake and coverage levels above England levels: Cumbria; Durham Dales, Easington & Sedgefield; Hambleton, Richmondshire & Whitby; North Durham; North Tyneside; and Northumberland. Screening uptake and coverage for bowel cancer were below England levels for Hartlepool & Stockton-on-Tees, South Tees, South Tyneside, and Sunderland CCGs.

Emergency presentations: All CCGs had emergency presentation (year to Q4 2016) levels at or above England.

Cancer waiting times: Both the two-week and 62-day waiting times standards (in the year to Q2 2017/18) were not met in Darlington and Hartlepool & Stockton-on-Tees CCGs. Over the same period, the 62-day waiting times standard was met in six CCGs in the Alliance.

Early diagnosis: The proportions of cancers diagnosed at stages 1 and 2 were below the England levels in Cumbria, North Durham, South Tees, and Sunderland CCGs.

Incidence: Incidence rates were higher than the England level in seven CCGs in the Alliance: Darlington; Durham Dales, Easington & Sedgefield; Newcastle & Gateshead; North Tyneside; South Tees; South Tyneside; Sunderland.

Survival: All but two CCGs (Hambleton, Richmondshire & Whitby, and Northumberland) were below the England level on one-year survival.

Mortality: Seven CCGs were above the England level for under-75 cancer mortality: Darlington; Durham Dales, Easington & Sedgefield; Hartlepool & Stockton-on-Tees; Newcastle & Gateshead; North Tyneside; South Tees; Sunderland.

Patient experience: Patient reported experience of care was generally in line with the England level across the Alliance, although reported as higher in four CCGs: Hartlepool & Stockton-on-Tees; Newcastle & Gateshead; Northumberland; South Tyneside.

*Please note that results are presented throughout the report for either North Cumbria CCG or Cumbria CCG, according to the period reported. This is due to the introduction of North Cumbria CCG in April 2017, replacing Cumbria CCG and covering Allerdale, Carlisle, Copeland and Eden. The exception is for operational performance data with results for Cumbria CCG presented for 2016/17 Q3 and Q4, and results for North Cumbria CCG presented for 2017/18 Q1 and Q2 (i.e. both covering a different 6 month period).

2. About the data pack

Cancer Alliances were formed as a result of recommendations in the 2015 Independent Cancer Taskforce's Achieving World-Class Cancer Outcomes report. The 19 Alliances lead on the local delivery of the Cancer Strategy Implementation Plan, using a whole pathway and cross-organisational approach.

CADEAS is a partnership between NHS England and Public Health England. The service supports Alliances with their data, evidence and analysis needs, to help drive evidence-based local decisions in the delivery of the Cancer Strategy Implementation Plan.

This data pack aims to provide all Cancer Alliances in England with a snapshot of cancer in their local populations, with a breakdown by Clinical Commissioning Group (CCG).

3. How to interpret the data

This data pack highlights variation in cancer services across CCGs in the Alliance. By using a colour coding system Alliances can identify where variation exists and prioritise areas for action. Data here should be considered alongside other sources of information for contextual and richer interpretation.

The colour system: broadly, yellow indicates data are similar to the England level. Dark blue shows data are better than England and light blue indicates data are worse than England. Some metrics have been benchmarked to operational standards or expected values; these are denoted in the legends and in the Annex. All statistical tests for England benchmarking have been conducted using a 95% confidence level.

At the time this report was made, there were three sites of the National Cancer Vanguard and 16 Alliances and the metric geography labels reflect this.

Information on data sources can be found in the Annex.

4. Data releases

CADEAS have released the following products, containing data metrics for the Cancer Alliances:

- ◆ A one-off CCG level data pack for each of the 19 Cancer Alliances, to enable comparisons across CCGs within an Alliance.
- ◆ Indicator summary grids comprising key indicators for each Alliance, available at CCG, STP and Alliance levels. These are similar to the grids found in sections 5 and 6 of this data pack and are published by CADEAS on a monthly basis.

5. Cancer Alliance key indicators grid, by CCG

	One-year cancer survival	Under 75 cancer mortality age-standardised rate	Patient experience	Bowel screening coverage (60-69)	Bowel screening uptake (60-69)	Bowel screening coverage (60-74)	Bowel screening uptake (60-74)	Breast screening coverage	Breast screening uptake	Cervical screening coverage	Emergency presentations	Cancer Waiting Times: Two-Week Wait	Cancer Waiting Times: 62-day Standard	Incidence age-standardised rate	Early stage diagnosis	Cancers staged
