National Cancer Action Team
Part of the National Cancer Programme

Workshops

Peer Review

National Cancer Peer Review (NCPR) is a national quality assurance programme for NHS cancer services. The programme involves both self-assessments by cancer service teams and external reviews of teams conducted by professional peers, against nationally agreed “quality measures”. NCPR is managed by the National Cancer Action Team and is an integral part of the NHS Cancer Reform Strategy (2007) and the overall NHS Cancer Programme, led by the National Cancer Director.

Tumour Site Specific - Lung

This session will cover the anatomy, presentation, investigation used and the treatment options of lung cancers. The session will complete with a question and answer session.

Tumour Site Specific – Colorectal

This session will cover the anatomy, presentation, investigation used and the treatment options of colorectal cancers. The session will complete with a question and answer session.

A sharing table will be available at the Conference should you wish to “share” documents, protocols, ideas etc with colleagues.
